Museo della scienza e della tecnica di Milano: tante le offerte durante le feste natalizie

MILANO, 26 dicembre 2018. Da **oggi fino a lunedì 31 dicembre** e da **mercoledì 2 a domenica 6 gennaio** il **Museo Nazionale della Scienza e della Tecnologia** è aperto tutti i giorni con orario festivo (**chiuso invece martedì 1 gennaio**) e una grande offerta di attività per adulti e bambini. **Tutte le attività dei laboratori e le mostre temporanee sono incluse nel biglietto d'ingresso al Museo.**

Nell'**i.lab Genetica**, i bambini a partire da 7 anni e adulti possono costruire una micro-serra da appendere all'albero di Natale, per osservare da vicino come si sviluppa una piccola pianta e di cosa ha bisogno per crescere. Mentre nell'**i.lab Chimica**, mescolando maizena, acqua e colla, creano divertenti oggetti dalle diverse consistenze. Nell'**i.lab Alimentazione**, scoprono come la scienza sia nascosta anche nelle ricette dei dolci delle feste e provano a trasformare una palla di ghiaccio in un meraviglioso oggetto artistico.

Nella **Tinkering Zone**, adulti e bambini a partire da 8 anni realizzano, come in una macchina di Goldberg, una grande reazione a catena per aprire un pacchetto con un regalo speciale.

Nell'**i.lab Area dei Piccoli**, i bambini da 3 a 6 anni giocano con luci, ombre e musica per costruire tutti insieme una grande scena natalizia. In alcune giornate i più piccoli possono partecipare anche a speciali **visite guidate nell'Area Spazio** Con il naso all'insù.

Altre attività interattive vengono proposte a rotazione nell'**i.lab Leonardo**, nell'**i.lab Matematica** e nell'**i.lab Bolle di sapone**.

Nel **weekend 29 e 30 dicembre e mercoledì 2 gennaio** i ragazzi dagli **8 ai 12 anni** possono partecipare a un **workshop di coding** curato da Ubisoft, in cui realizzano un vero e proprio videogioco a tema spaziale. Adulti e ragazzi possono inoltre giocare al nuovissimo titolo "Starlink: Battle for Atlas".

Non mancano le **mostre temporanee**, come l'esposizione di auto e moto d'epoca **Le forme della velocità** e la sfilata di arte e scienza **Leonardo da Vinci Parade** in cui i modelli leonardeschi si accostano agli affreschi del XVI
